

19 August 2021

To whom it may concern,

As a part of Epson's commitment to the environment we continuously work on improving the environmental performance of our products. In recent years the focus of our program has, amongst others, been focused on the use of safe chemical substances within our products with a view to contributing to the protection of human health and the environment, including the environmental recovery and disposal of waste.

By this statement Epson confirms that:

- ❖ Flammable properties

The products listed in the Annex are not classified flammable.

- ❖ Vegan

The products listed in the Annex do not contain intentionally animal-derived ingredients from the information we have from our suppliers at this time.

Epson has not conducted testing on animal and does not condone animal cruelty. However, some individual substances might have been tested by the raw material suppliers themselves due to local regulations.

Products

Sincerely yours,

Boris MANEV

Head of Government Affairs and Corporate Sustainability EMEAR.
